MATHEMATICS – Effective Fall 2021*

It is recommended that students enroll in the highest-level math class for which they qualify (and is appropriate for their majors). Courses listed below in [brackets] *may* be taken, but are at a lower mathematical level than is recommended.

Course Placement	Ways to Meet Course Placement			
	GDMP	MPLA	MPLB	MPTC

GDMP = GUIDED/DIRECTED MATH PLACEMENT
MPLA = MATH MAPLE TEST A (computerized)

MPLB = MATH MAPLE TEST B (computerized)
MPTC = MATH PLACEMENT TEST C

* Due to the wide variability in levels at which developmental mathematics courses are taught at various schools, students transferring in mathematics courses which appear to be equivalent to courses here at La Verne must complete either the SLATE or Qualtrics directed self-placement survey to determine their mathematical aptitude and the correct level of course for them to be placed into. For effective placement, students should enroll in a math course in the semester immediately following the test. If you have any questions regarding placement, please contact the Academic Success Center or the Chair of the Math Department.

** {Students who score 23-25 are also eligible to take College Algebra Competency Exam -- refer to Math Dept. }
