

Peace
Corps

PREP

The Peace Corps Prep program will prepare you for international development fieldwork and potential Peace Corps service. To accomplish this, you'll build four core competencies through interrelated coursework, hands-on experience, and professional development support. These four competencies, or "learning objectives," are the following:

1. Training and experience in a work sector
2. Foreign language skills
3. Intercultural competence
4. Professional and leadership development

This document explains each of these requirements in detail. *Use this guide to map out your Peace Corps Prep course of study.* In particular, refer to this when completing your PC Prep application, where you'll need to document how you plan to fulfill each requirement.

TRAINING AND EXPERIENCE IN A SPECIFIC WORK SECTOR

Leveraging concrete knowledge and skills is central to on-the-ground international development work. Through this PC Prep program, you will begin to build a professional specialty, which should serve your career well whether or not you become a Peace Corps Volunteer.

For PC Prep, you need to complete at least **3 courses** that align with a specific work sector (they can but do not need to come from your academic major or minor). You also must accumulate a **minimum of 50 hours of volunteer or work experience in that same sector, preferably** in a teaching or outreach capacity.

If you intend to apply to the Peace Corps, the best way to assure that you will be a strong candidate is to identify the type of assignments in which you'd like to serve through this interactive tool (www.peacecorps.gov/openings), then review the positions' desired qualifications and build them up accordingly. In the process, you should fulfill these PC Prep experiential requirements!

There are six sectors in which Peace Corps Volunteers serve-detailed below. **Choose one sector to focus on** then complete at least 3 courses + 50 hours of related experience in that sector.

Note: Actual Peace Corps assignments are based on local needs, and thus may or may not align seamlessly with your qualifications. Flexibility is central to the Peace Corps experience!

EDUCATION

Teach lessons that last a lifetime. Education is the Peace Corp's largest program area. Volunteers play an important role in creating links among schools, parents, and communities by working in elementary, secondary, and postsecondary schools as math, science, conversational English, and resource teachers or as early grade reading and literacy teacher trainers. Volunteers also develop libraries and technology resource centers.

If you choose Education, take 3 courses from one of the following areas:

Elementary, Secondary or Special Education
English or Linguistics
Math
Computer Science
Any Physical or Biological Science

And build 50 hours of related field experience through an activity such as:

Teaching in one of these or a similar form: in a classroom, with a community outreach organization, or in a formal tutoring capacity.
The subject of the teaching may be English as a Foreign/Second Language, special education, drama, or a STEM subject.

HEALTH

Serve on the front lines of global health. Health Volunteers work within their communities to promote important topics such as nutrition, maternal and child health, basic hygiene, and water sanitation. Volunteers also work in HIV/AIDS education and prevention programs to train youth as peer educators, develop appropriate education strategies, provide support to children orphaned by the pandemic, and create programs that provide emotional and financial support to families and communities affected by the disease.

If you choose Health, take three courses from one of the following areas:

Community Health
Biology
Psychology
Kinesiology
Health Administration

And build 50 hours of related field experience through an activity such as:

Volunteer or work experience in such areas as HIV/AIDS outreach, hospice, family planning counseling, emergency medical technician (EMT) or CPR teaching/certification, maternal health, and hands-on caregiving in a hospital, clinic, or lab technician setting
Counseling or teaching in health subjects
Working as a resident advisor in a dormitory, as a peer nutritionist, or as a sexually transmitted infections counselor

ENVIRONMENT

Help forge a global movement to protect our planet. Volunteers lead grassroots efforts in their communities to protect the environment and strengthen understanding of environmental issues. They teach environmental awareness in elementary and secondary schools and to youth groups and community organizations, empowering communities to make their own decisions about how to protect and conserve the local environment. Volunteers also address environmental degradation by promoting sustainable use of natural resources.

If you choose Environment, take three courses from one of the following areas:

Sustainability
Chemistry
Biology

And build 50 hours of related field experience through an activity such as:

Educating the public on environmental or conservation issues, or working on environmental campaigns
Conducting biological surveys of plants or animals
Gardening, farming, nursery management, organic or low-input vegetable production, or landscaping
Providing technical assistance and training in natural resource management

AGRICULTURE

Lead grassroots efforts to fight hunger in a changing world. Agricultural Volunteers work with small-scale farmers and families to increase food security and production and adapt to climate change while promoting environmental conservation practices. They introduce farmers to techniques that prevent soil erosion, reduce the use of harmful pesticides, and replenish the soil. They work alongside farmers on integrated projects that often combine vegetable gardening, livestock management, agroforestry, and nutrition education.

If you choose Agriculture, take three courses from one of the following areas:

Business or economics
Biology

And build 50 hours of related field experience through an activity such as:

Working with a large-scale or family-run business involving vegetable gardening, farming, nursery work, tree planting or care, urban forestry, landscaping, livestock care and management, or fish cultivation and production
Teaching or tutoring the public in environmental or agricultural issues/activities
Working on the business management or marketing side of a commercial farm

COMMUNITY ECONOMIC DEVELOPMENT

Harness 21st-century tools to help communities lift themselves. Volunteers work with development banks, nongovernmental organizations, and municipalities to strengthen infrastructure and encourage economic opportunities in communities. They frequently teach in classroom settings and work with entrepreneurs and business owners to develop and market their products. Some Volunteers also teach basic computer skills and help communities take advantage of technologies such as e-commerce, distance learning, and more.

If you choose Community Economic Dev., take three courses from one of the following areas:

Business or Public Administration
Nonprofit Management
Accounting, Banking or Finance
Computer Science/Engineering
Communications
International Business and Language

And build 50 hours of related field experience through an activity such as:

Working with businesses, organizations, or cooperatives in accounting, finance, microfinance, management, project management, budgeting, or marketing
Starting and running your own business or other entrepreneurial activity
Training others in computer literacy, maintenance, and repair
Website design or online marketing
Founding or leading a community- or school-based organization

Nearly two-thirds of Peace Corps Volunteers serve in Education or Health. Coursework and meaningful experience in one of these areas-especially teaching English as a second/foreign language-produce some of the strongest candidates.

YOUTH IN DEVELOPMENT

Empower the next generation of changemakers.

Volunteers work with youth in communities on projects that promote engagement and active citizenship, including gender awareness, employability, health and HIV/AIDS education, environmental awareness, sporting programs, and info technology.

If you choose Youth in Development, take three courses from one of the following areas:

Sociology
Educational Studies
Community Service
Child Development
Psychology

And build 50 hours of related field experience through an activity such as:

Teaching or counseling in at-risk youth programs
Activities that involve planning, organizing, assessing community needs, counseling, and leadership, in areas such as education, youth development, health and HIV/AIDS, the environment, and/or business

Working across cultures often entails verbal and nonverbal languages distinct from your own. Building foreign language skills is thus a second key component of the PC Prep curriculum.

Where would you like to serve? PC Prep minimum course requirements align with those needed by applicants to the Peace Corps itself, which vary by linguistic region.

- *Latin America:* Individuals wanting to serve in Spanish-speaking countries must apply with strong intermediate proficiency. This typically means completing **two 200-level courses**.
- *West Africa:* Individuals wanting to serve in *French-speaking* African countries should be proficient in French (or, in some cases, any Romance Language), usually through **one 200-level course**.
- *Everywhere else:* The Peace Corps has **no explicit language requirements** for individuals applying to serve in most other countries. However, you will still likely learn and utilize another language during service, so it is only helpful to have taken at least one foreign language class.

Note: If you are a strong native speaker and want to serve in a country that speaks your same language, you can skip this requirement!

FOREIGN LANGUAGE SKILLS

Engaging thoughtfully and fluidly across cultures begins with one's own self-awareness. With this learning objective, you will deepen your cultural agility through **a mix of three introspective courses** in which you learn about others while reflecting upon your own self in relation to others. The goal is for you to build your capacity to shift perspective and behavior around relevant cultural differences. Some example courses:

You'll take at least 1 of these core courses:

- CS 305: Learning through Community Service (approved by OCCE Director)
- ECON 325: International Economics
- ANTH 409: International Development and Human Rights
- PLSC 452: Comparative Government & Politics
- SPCM 220: Intercultural Communications

And choose 2 additional electives from the above list or these below:

- GEOG 201: Introduction to Geography
- BUS 341: International Business
- INTD 305: Pathways to Peace
- EDU 460: Diversity, Interaction and the Learning Process
- HUM 305: Values & Critical Thinking

Is there another course in the catalog that you feel meets this requirement? Please discuss it with your PC Prep Coordinator/OCCE Director.

Prolonged intercultural experiences-such as studying or volunteering abroad, supporting new immigrants or refugees acculturate to the United States, or volunteering in diverse schools-would also strengthen your Peace Corps candidacy significantly.

FOREIGN LANGUAGE SKILLS

International development is a highly professional sector. It is difficult to break into and demands great initiative and leadership to advance professionally within the field. PC Prep requires **three specific activities** that will strengthen your candidacy for the Peace Corps (or any other professional endeavor):

1. Have your **resume** critiqued by someone in Career Services office
2. Attend a workshop or class on **interview skills** at Career Services office
3. Develop at least one significant **leadership experience** and be prepared to discuss it thoughtfully. For example, organizing a campus event, leading a work or volunteer project, or serving on the executive board of a student organization.

**Peace
Corps**

PREP

The Peace Corp Prep is run on a cohort model. Although individuals will enter as a cohort, they will not necessarily exit as one. Completion of the program is based completion of required courses (including foreign language requirement), individual community engagement project, and participation in professional and leadership development program associated with the PCP program. An exit interview will be conducted with each participant to ensure successful completion and ability to receive the PCP certificate.
