

View xForm - Mentor Approved Human Subjects Research Application

The Mentor Approved Human Subjects Research Application is for research involving human subjects that does not need to be approved by the Institutional Review Board based on specific qualifications/requirements.

Mentor Approved Application Data Entry

Application

Example

Instructions for completing the Mentor Approved Human Subject Research Application. Please select from the options below and complete the appropriate form.

If the student(s) are:

1) Completing the ULV IRB forms (application, human subjects training, etc.) in the classroom as a course assignment, then the instructor and the student do not need to submit anything to the ULV IRB. DO NOT COMPLETE THIS FORM (paper copies that can be used in the classroom are available on the ULV IRB website).

2) Completing a class/course project involving human subjects research only intended for the classroom (e.g. will not be presented at a conference or published), then submit this form with your proof of completion of human subject's protections (NIH or CITI training certificate) training, along with mentor approval.

3) Completing a master's thesis/doctoral dissertation, then student will need to exit out of this form and submit a new Initial ULV IRB application to the ULV IRB with proof of completion of human subject's protections (NIH or CITI training certificate) training, along with mentor/advisor or dissertation chair approval.

4) Completing an undergraduate senior thesis, research project or graduate capstone that involves human subjects that is NOT LOW risk and is only intended for the classroom (e.g. will not be presented at a conference or published), then submit this form with your proof of completion of human subject's protections (NIH or CITI training certificate) training, and along with mentor approval (same as #2).

5) Completing an undergraduate senior thesis/research project or graduate capstone that involves human subjects, and the student plans to present at a conference, has plans to publish, and/or the study involves more than MINIMAL risk (interventions, research involving vulnerable populations, etc...), then the student will need to submit a new Initial ULV IRB application with proof of completion of human subject's protections (NIH or CITI training certificate) training, along with mentor/advisor or dissertation chair approval. Please exit out of this form and select the Initial ULV IRB application form from the prior menu.

Submitter Information

Chrisco, Kanya Godde Ph.D.

Email: kgodde@laverne.edu

Phone:

ULV Advisor/Mentor Contact (type in email address; the name will populate once you move to the next question)

No answer provided.

List all other students involved in the study (first and last name and email address, e.g. John Smith, jsmith412@laverne.edu). Write "none" if there are none.

No answer provided.

ULV Course Name, Subject, and Class Number (e.g. Senior Thesis A, Anth 499)

No answer provided.

Study Title

No answer provided.

Protocol Description/What will you do with the human participants?

No answer provided.

*Describe in detail all the methods and procedures that involve human participants. This section should help the ULV IRB Committee understand from initial contact to completion of the research protocol what will happen to participants and is the **most important part of your application**. State the following in chronological order: 1) what the participants will be asked to do, 2) where the research will occur, 3) what measures will be used (e.g. test), 4) what data and information will be collected and how, 5) whether participants will be identified (further elaborated on in the confidentiality section), 6) whether participants will receive an incentive to participate and if so describe, and 7) how long it will take to complete the instrument and/or task (if multiple items, break down by item).*

Is this Human Subjects Research?

No answer provided.

Does your research include humans as the subjects?

What type of methodology are you proposing for this project/study?

No answer provided.

Type of Project

No answer provided.

ULV College/Program

No answer provided.

What is the minimum age of proposed participants?

No answer provided.

Do you plan to publish or present this research off campus (conference, journal article, etc.)?

No answer provided.

If you plan to publish or present off campus you will need to submit a NEW ULV IRB application for review instead of this application.

Are you planning on using an informed consent? If yes, make sure to include that as an attachment with your application.

No answer provided.
